Script Name:

GDPR Maintenance

Script Type:

Event Handler

Overview

This script actions and implements all the GDPR tasks which the manager had previously done via the to-do list. As this is a very demanding task it is ran once a day ideally when as few people on the system as possible.

Dependencies

- GDPR Update script to have populated the GDPR SQL tables within the database.
- The GDPR to-do list form event script to enable the to-do list items to be clickable.
- The GDPR to-do list script to enable the manager to action GDPR tasks.

Operation Example

- Manager will not notice this script running as its configured via the Event Handler.

Configuration

- Assigned via an Event Handler trigger script event every few hours. Recommended to be ran like the system maintenance (every 3 hours)
