

# Genetec Integration datasheet

This API integration is compatible with Genetec version 5.8 and onwards. Part code: GSC-1SDKTIMEWARE-TWPro

# Genetec

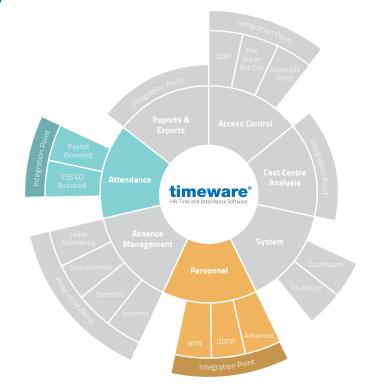

Genetec is a world class provider of IP-based security solutions. From CCTV, physical access control through to vehicle barrier control and ANPR, Genetec can provide resilient, connected solutions for every market sector.

### timeware<sup>®</sup>/Genetec Approved Integration overview

timeware<sup>®</sup> have created an API integration between Genetec and timeware<sup>®</sup> Small Business and timeware<sup>®</sup> Professional. This means that Genetec customers requiring a feature rich employee attendance solution can benefit from a software only integration that requires no additional attendance devices.

This integration eliminates 'duplicate entry' enabling personnel/cardholder and their associated credentials created in timeware to be passed directly to Genetec.

Eg: An administrator can specify which readers are classed as attendance points and bookings made at these points can be read by timeware<sup>®</sup> from the database and processed by timeware<sup>®</sup> as attendance bookings.

# timeware<sup>®</sup>/Genetec integration functions

### timeware<sup>®</sup> Personnel

The API integration enables control of the transfer from timeware® Personnel and Genetec Cardholder.

### 🏶 Roles and units 🚼 Cardholders and credentials 📓 Access rules 📧 Badge templates 🥤 General setti Ŷ 000 • 11 Search for -Search through: terminal\_policy\_id ٠ Search type: Contains • Drag a column header here to group by that column. 4:00-22: Description I cardholi All hours, all d lo access opfloor Only Working hour Copy... Close ....

# timeware<sup>®</sup> Terminal Policy

The API integration enables control of the transfer of timeware<sup>®</sup> Terminal policies to Genetec Cardholder policies.

The API integration enables control of the transfer from Genetec Events to timeware® Bookings.

# timeware<sup>®</sup> Bookings

### **Genetec Events**

# **Genetec Doors**

# Technical

Executed by the NMD3 Event Handler service.

Integration frequency determined during configuration.

### Employees

Newly added personnel records are created in timeware<sup>®</sup> and are sent across to the Genetec system along with their relative fields below.

Genetec Field	timeware® Field
Name	First name + Last name
Cardholder Policy	Terminal policy (temployee.terminal_policy_id)

### Doors + Cardholder Policies:

Any new doors or cardholder policies created in Genetec get automatically sent across to timeware<sup>®</sup>. Doors get created as terminals in timeware<sup>®</sup> - based on the requirements, you will either set it as an access control device or an attendance device. All devices are initially suspended, and you unsuspend the devices we are required to pull data from. Cardholder groups get created as terminal policies and are assigned against the personnel records.

Genetec Field	timeware <sup>®</sup> Field
Devices	Terminals (new tterminal record)
Cardholder Policy	Terminal Policy (new tterminal_policy record)

### **Bookings/Events:**

Events from the Genetec database get brought into timeware<sup>®</sup> to be shown as access control or attendance data. This is decided by the device type of the corresponding tterminal record.

Genetec Field	timeware® Field
Events	twork records (could be access or attendance data based off
	corresponding tterminal record)

# Annual licence

The Genetec integration is enabled by an annual licence.
